➢ Introduction
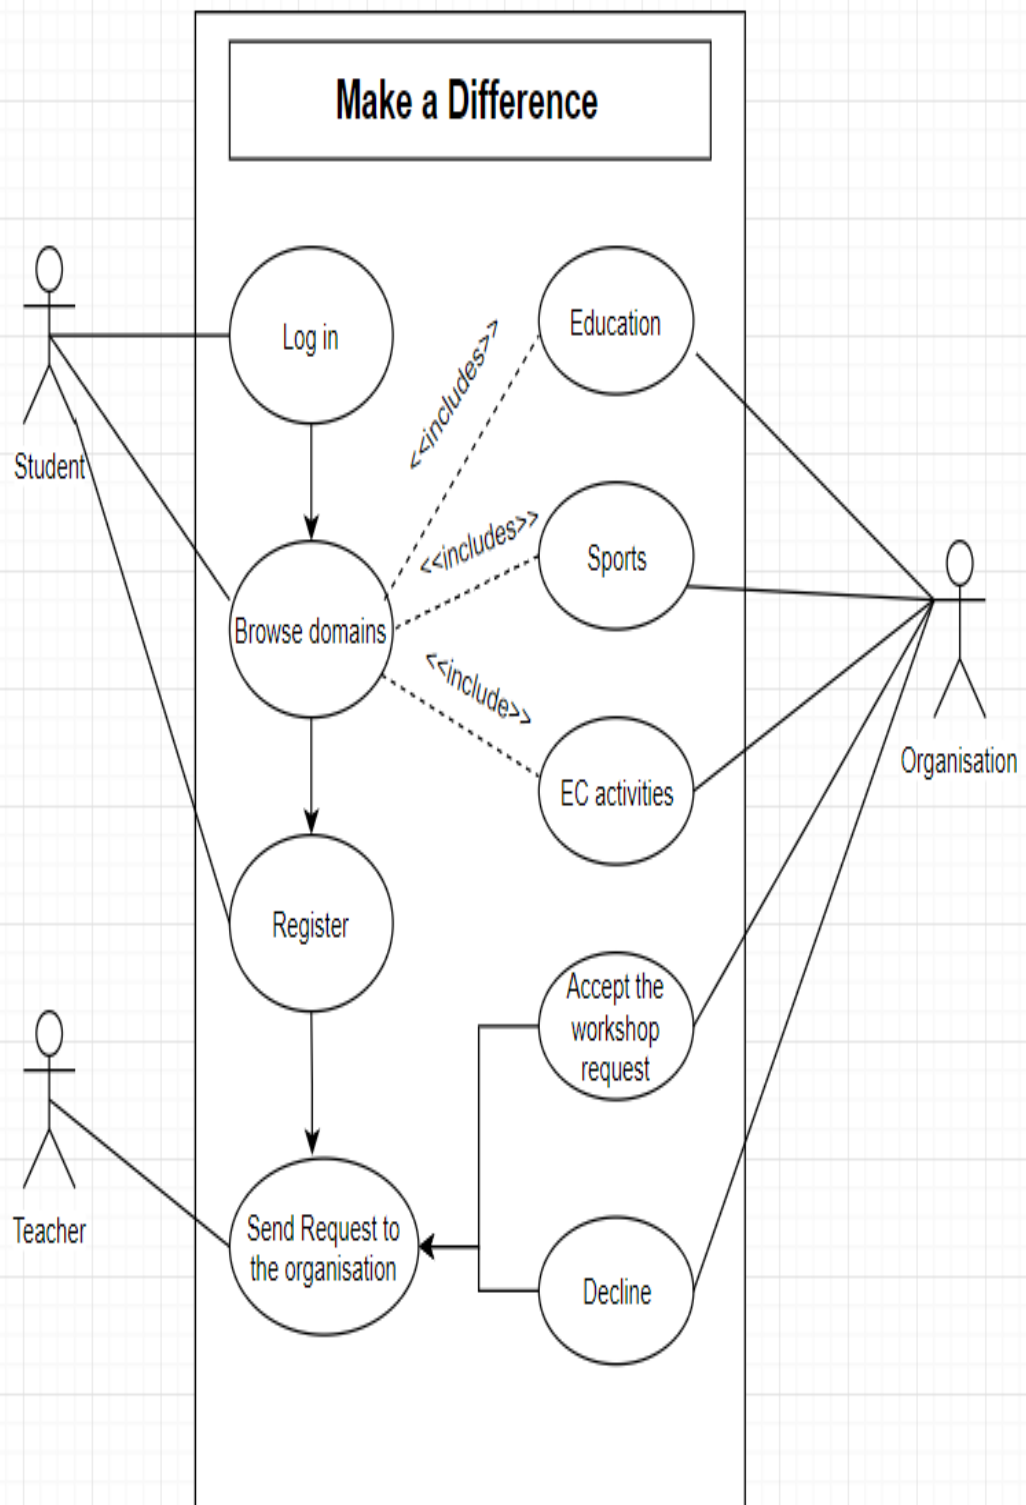

This project's main aim is to help unprivileged students to get the best immunities and education along with extra-curricular activities. Using this application, they can browse various organizations and academies nearby their village. On the other hand, the organizations also get benefitted by conducting camps and workshops in bulk. This project presents a way of writing the project report using MS-word.

➢ Motivation

The motivation for this work is Kisan Suvidha app. Pitching for the second green revolution in the country based on science, technology and modern inventions in the agricultural sector, Prime Minister Narendra Modi launched the Kisan Suvidha app for the farmers. This inspired me and my team to do something for the rural children.

Make A Difference

Our goal:

A guide for the village Students to explore.

Helped over 2500+ students

Who we are?

We started this organisation Make A Difference in 2015 with the aim to help village students. Having seen many village students dropping their studies after high school and having dilemma of what to study after school and ending up in wrong platform, we created this portal to connnect them with various organisation and institution in their district and giving them a guidance and skills at low or free of cost.

Education is the movement from dark to light

We offer them a good learning material which helps them get through their Entrance examination and also to prepare for their board. And we recently launched online classes because a virus should not change a child's future.

Sports

Not only Education, we also help to create a good sportsman by helping to connect with sports organisation and updating with the district, state,National level sports event.

Extra Curricular Activities

Encourage them and enabling the students to gain more Skills by participating in Workshops and by recommending them to join a course with free of cost

Get connected
